

## Noon-Time Art Enrichment

To benefit and enhance children's motor skills and creativity,  
Colors In Clay has developed a  
**Noon-Time Enrichment Program**  
that kids just love to attend while learning to work with  
wet clay and child friendly glass -  
forming wonderful projects and gifts that delight all.

- First Colors In Clay will work with your school to create a schedule, using your art room at the noon-time recess.
- Colors In Clay will create a flyer and make copies that will be distributed through the children's take home mail to their parents.
- Children will return the enrollment forms and checks to the school office.
- Colors In Clay will collect the enrollment forms and prepare class materials.
- On each scheduled day of the enrichment session, Colors In Clay will bring all of the materials needed for the children to create their works with our guidance.
- When the Enrichment Program is complete, Colors In Clay will bring to your school, all of the fired art work that the children have created. The artwork will be bagged for gift giving and labeled with the children's names for easy distribution.

That's it!

Colors In Clay will make it that easy  
for you to delight the  
children and parents of your school!
